LUKE THOMPSON

ASSOCIATE SOFTWARE DEVELOPER

Hamilton, ON · 905-806-9257 · stevenlukethompson@gmail.com
Portfolio: xylardark.github.io/Portfolio-Studio/u/admin/priceline · GitHub: github.com/XylarDark

PROFESSIONAL SUMMARY

Associate software developer with C#, JavaScript, Python, SQL, and automated tests. At OutFusion I built and tested C# REST integrations; at TruckSail I wrote JS/SQL web tooling and C++ firmware; at Evenica I built and tested T-SQL and C# client software. I write unit tests in TypeScript (Shift, 83 Vitest files) and Python (HomeWorld), use GitHub workflows, and use AI coding agents under review gates.

CORE SKILLS

Languages	C#, JavaScript/TypeScript, Python, SQL, C++, HTML/CSS
Web & data	REST APIs, SQL Server, MySQL, Supabase (Postgres), React, Vite
Testing & CI	Vitest, pytest, unit tests alongside code, Git/GitHub, GitHub Actions, pull-request review
AI tooling	Directing AI coding agents with review gates and verification of their output

SELECTED PROJECTS

Portfolio Studio — media-résumé site Sep 2026 – present

Independent · React, TypeScript, Vite, Supabase · xylardark.github.io/Portfolio-Studio

- React/TypeScript portfolio product with Studio editing, a Supabase (Postgres) backend and per-employer pages, built with AI coding agents through pull requests I review; headless-Chrome checks at desktop and phone sizes, and GitHub Actions deploys each merge.

Shift — playable shop & delivery game Aug – Sep 2026

Independent · Phaser 3, TypeScript, Vite · Live: xylardark.github.io/ShiftGame

- Shipped a TypeScript browser/PWA game for desktop and phones with a fixed 60 Hz simulation and cached A* routing; 83 Vitest test files in the public repo.

HomeWorld — AI-agent tooling and verification Feb 2026 – present

Independent (solo) · Unreal Engine 5.8, C++, Python · private repository, available on request

- Built an editor automation bridge: agents and scripts send a JSON `{command, args}` request and get structured JSON back (world info, asset checks, a per-row pass/fail probe); new command modules plug in.
- Built checks that refuse a false "done": a headless test runner that hard-fails on five causes of fake passes (unreadable report, wrong engine, zero tests run, stale report, stale binaries), each with a regression test, and a build wrapper with one machine-wide queue so parallel agents can't collide.
- Run a multi-agent workflow (research, design, implementation, testing roles) with written handoff rules and merge gates; source changes wait for my review.
- A tool-capability matrix gives every claim an evidence level from E0 (only claimed in a doc) to E5 (survived a fresh editor). 42 C++ automation test files and 150+ Python test files.

EXPERIENCE

Game Developer · OutFusion · Hamilton, ON Feb 2022 – Dec 2022

- Implemented game UI/UX from the design docs; built and tested C# REST API integrations for player data; integrated and tested game UI across mobile and desktop; partnered on bug verification and release quality.

Software Developer · TruckSail · Ancaster, ON Feb 2020 – Jan 2021

- Wrote C++ firmware for truck ECU devices (STM32, CAN bus) with defect finding for reliability; built JS/Bootstrap UIs and optimized SQL; maintained GitHub workflows and did cross-browser QA.

Software Developer & QA Tester · Evenica · Burlington, ON May 2018 – Sep 2019

- Built and tested client software (Andrew Peller, Young's Market Company, MM Realty International): T-SQL, C#, Linux, and Laravel (MySQL, PHP, JavaScript/jQuery, Vue.js).

Delivery Driver (Uber, retail delivery) · Hamilton, ON Jun 2022 – present

EDUCATION

Diploma, Computer Systems Technology — Software Development · Mohawk College · Hamilton, ON · 2019

Valid Ontario Class G licence · Open to hybrid in Toronto, two days in-office (commuting from Hamilton)
