LUKE THOMPSON

SOFTWARE DEVELOPER 1 · C# / C++

Hamilton, ON · 905-806-9257 · stevenlukethompson@gmail.com
Portfolio: xylardark.github.io/Portfolio-Studio/u/admin/zynga · GitHub: github.com/XylarDark

PROFESSIONAL SUMMARY

Junior software developer with C# and C++, SQL, and automated tests. At OutFusion (Feb – Dec 2022) I built and tested C# REST integrations for player data and implemented game UI. At TruckSail (Feb 2020 – Jan 2021) I wrote C++ firmware and JS/SQL web tooling. Since February 2026 I have been writing C++ and Python tooling on HomeWorld, including checks that refuse a false pass, and I use AI coding agents under review gates. I also ship TypeScript (Portfolio Studio, Shift).

CORE SKILLS

Languages	C#, C++, TypeScript/JavaScript, Python, SQL, HTML/CSS
Web & data	REST APIs, React, Vite, SQL Server, MySQL, Supabase (Postgres)
Testing & tooling	Vitest, pytest, automated test runners, Git/GitHub, GitHub Actions, AI coding agents with review gates
Game-adjacent	C# game UI and player-data APIs (OutFusion); Unreal Engine 5.8 / C++ (HomeWorld, solo)

SELECTED PROJECTS

HomeWorld — C++ game, test and build automation Feb 2026 – present

Independent (solo) · Unreal Engine 5.8, C++, Python · private repository, available on request

- Write C++ gameplay and engine-side code, and Python tooling that drives the editor and checks results against real state.
- Built a headless test runner that hard-fails on five causes of fake passes (unreadable report, wrong engine, zero tests run, stale report, stale binaries), each with a regression test.
- Some of this code is written by AI coding agents under my direction; source changes wait for my review before they merge. 42 C++ automation test files and 150+ Python test files.

Portfolio Studio — media-résumé site Sep 2026 – present

Independent · React, TypeScript, Vite, Supabase · xylardark.github.io/Portfolio-Studio

- React/TypeScript portfolio product with Studio editing, a Supabase (Postgres) backend and per-employer pages, built with AI coding agents through pull requests I review; headless-Chrome checks at desktop and phone sizes, and GitHub Actions deploys each merge.

Shift — playable shop & delivery game Aug – Sep 2026

Independent · Phaser 3, TypeScript, Vite · Live: xylardark.github.io/ShiftGame

- Shipped a TypeScript browser/PWA game for desktop and phones with a fixed 60 Hz simulation and cached A* routing; 83 Vitest test files in the public repo.

EXPERIENCE

Game Developer · OutFusion · Hamilton, ON Feb 2022 – Dec 2022

- Implemented game UI/UX from the design docs; built and tested C# REST API integrations for player data; integrated and tested game UI across mobile and desktop; partnered on bug verification and release quality.

Software Developer · TruckSail · Ancaster, ON Feb 2020 – Jan 2021

- Wrote C++ firmware for truck ECU devices (STM32, CAN bus) with defect finding for reliability; built JS/Bootstrap UIs and optimized SQL; maintained GitHub workflows and did cross-browser QA.

Software Developer & QA Tester · Evenica · Burlington, ON May 2018 – Sep 2019

- Built and tested client software (Andrew Peller, Young's Market Company, MM Realty International): T-SQL, C#, Linux, and Laravel (MySQL, PHP, JavaScript/jQuery, Vue.js).

Delivery Driver (Uber, retail delivery) · Hamilton, ON Jun 2022 – present

EDUCATION

Diploma, Computer Systems Technology — Software Development · Mohawk College · Hamilton, ON · 2019

Valid Ontario Class G licence · Open to working in Toronto (commuting from Hamilton)
