LUKE THOMPSON

SOFTWARE ENGINEER

Hamilton, ON · 905-806-9257 · stevenlukethompson@gmail.com
Portfolio: xylardark.github.io/Portfolio-Studio/u/admin/fable · GitHub: github.com/XylarDark

PROFESSIONAL SUMMARY

Software engineer focused on TypeScript tooling for AI agents: tool schemas, checks that refuse a false "done," and a phone review app. I have not yet shipped a production MCP server with the official TypeScript MCP SDK; the closest work is a JSON command/response tool bridge on HomeWorld, DreamEngine's done-gate and tool index, and Tether (a TypeScript PWA that went live 11 Nov 2026). I write tests (83 Vitest files on Shift, pytest on HomeWorld), use Git, code review and GitHub Actions, and have built and tested REST APIs in C# at OutFusion and Evenica. I have not run Node.js services on AWS in production.

CORE SKILLS

Languages	TypeScript/JavaScript, Python, C#, SQL, C++, HTML/CSS
Agent tooling	JSON tool bridges, done-gates, eval-style hard-fail checks, tool indexes, review cards
Testing & CI	Vitest, pytest, unit and integration tests, Git/GitHub, GitHub Actions, pull-request review
Web & APIs	REST APIs, React, Vite, Supabase (Postgres), phone PWA

SELECTED PROJECTS

Tether — phone app for reviewing computer work Nov 2026 – present

Independent (solo) · TypeScript, phone PWA · went live 11 Nov 2026 · private repository, available on request

- Phone PWA with push notifications and actionable decision cards that write answers back and can run declared actions. The phone is for reading, approving, and running declared actions — not for editing code or opening a public port.

DreamEngine — solo-dev automation harness Nov 2026 – present

Independent (solo) · agent orchestration, scheduled automation · private repository, available on request

- Built a done-gate (rebase, test rerun, merge-ready check), merge train, auto-resume, status notifier, and tool index (123 merged pull requests as of 12 Nov 2026). Preference-engine Layer 1 auto-defaults only at a 95% take rate over at least 20 evidenced answers; safety-sensitive types never auto-default.

HomeWorld — AI-agent tooling and verification Feb 2026 – present

Independent (solo) · Unreal Engine 5.8, C++, Python · private repository, available on request

- Built an editor automation bridge: agents and scripts send a JSON `{command, args}` request and get structured JSON back (world info, asset checks, a per-row pass/fail probe); new command modules plug in.
- Built a headless test runner that hard-fails on five causes of fake passes (unreadable report, wrong engine, zero tests run, stale report, stale binaries), each with a regression test. Source changes wait for my review.

Portfolio Studio and Shift Aug 2026 – present

React, TypeScript, Vite, Supabase / Phaser 3 · Portfolio Studio · Shift

- Portfolio Studio is a public React/TypeScript site with GitHub Actions deploys. Shift is a shipped TypeScript browser/PWA game with 83 Vitest test files.

EXPERIENCE

Game Developer · OutFusion · Hamilton, ON Feb 2022 – Dec 2022

- Implemented game UI/UX from the design docs; built and tested C# REST API integrations for player data; integrated and tested game UI across mobile and desktop; partnered on bug verification and release quality.

Software Developer · TruckSail · Ancaster, ON Feb 2020 – Jan 2021

- Wrote C++ firmware for truck ECU devices (STM32, CAN bus) with defect finding for reliability; built JS/Bootstrap UIs and optimized SQL; maintained GitHub workflows and did cross-browser QA.

Software Developer & QA Tester · Evenica · Burlington, ON May 2018 – Sep 2019

- Built and tested client software (Andrew Peller, Young's Market Company, MM Realty International): T-SQL, C#, Linux, and Laravel (MySQL, PHP, JavaScript/jQuery, Vue.js).

Delivery Driver (Uber, retail delivery) · Hamilton, ON Jun 2022 – present

EDUCATION

Diploma, Computer Systems Technology — Software Development · Mohawk College · Hamilton, ON · 2019

Valid Ontario Class G licence · Live in Hamilton, ON; can travel to Toronto for occasional in-person collaboration
