LUKE THOMPSON

SOFTWARE QA TESTER · TEST AUTOMATION

Hamilton, ON · 905-806-9257 · stevenlukethompson@gmail.com
Portfolio: xylardark.github.io/Portfolio-Studio/u/admin/paymentsource · GitHub: github.com/XylarDark

PROFESSIONAL SUMMARY

Developer who builds and runs tests. I worked as a Software Developer & QA Tester at Evenica (2018–19), verified bugs before release on a game team (OutFusion, 2022), did cross-browser QA and defect finding on firmware and web work (TruckSail), and since February 2026 have built test tooling for my solo Unreal Engine 5.8 / C++ project that refuses to report a pass it can't prove. I write automated tests in TypeScript (Vitest) and Python (pytest). Remote from Hamilton, ON.

CORE SKILLS

Testing	Automated and manual testing, regression tests, bug verification and reporting, cross-browser and mobile/desktop checks, test documentation
Test tools	Vitest, pytest, Unreal Automation framework, headless browser runs, GitHub Actions
Languages	JavaScript/TypeScript, Python, C#, C++, SQL, HTML/CSS
Web & workflow	React, Vite, REST APIs, Supabase, SQL Server, MySQL, Git/GitHub, pull-request review, JIRA

RELEVANT EXPERIENCE

Game Developer · OutFusion · Hamilton, ON — Feb 2022 – Dec 2022

- Implemented game UI/UX from the design docs; integrated and tested UI art assets across mobile and desktop; validated UX through iterative playtesting.
- Built and tested C# REST API integrations for player data; partnered on bug verification and release quality.

Software Developer · TruckSail · Ancaster, ON — Feb 2020 – Jan 2021

- Wrote C++ firmware for truck ECU devices (STM32, CAN bus) with defect finding for reliability; built JS/Bootstrap UIs and optimized SQL.
- Maintained GitHub workflows; cross-browser QA and password-management security support.

Software Developer & QA Tester · Evenica · Burlington, ON — 2018 – Sep 2019

- Built and tested client software (Andrew Peller, Young's Market Company, MM Realty International): T-SQL, C#, Linux, and Laravel (MySQL, PHP, JavaScript/jQuery, Vue.js).

SELECTED PROJECTS

HomeWorld — test and verification tooling — Feb 2026 – present

Independent (solo) · Unreal Engine 5.8, C++, Python · private repository, available on request

- The old test runner said "0 passed, 0 failed" on every run because a UTF-8 BOM broke the report parse and the error was swallowed. I rebuilt it so five causes of fake passes are hard errors, each with a regression test.
- A "19/19 passed" result once came from a binary nine minutes older than the code it claimed to test; the runner now refuses to start on stale binaries.
- Five asset validators run on save and in whole-project batch runs; data sheets are schema-checked with readable errors before anything changes. 42 C++ automation test files and 150+ Python test files.

Shift — playable shop & delivery game — Aug – Sep 2026

Independent · Phaser 3, TypeScript, Vite · Live: xylardark.github.io/ShiftGame

- Shipped a browser/PWA game for desktop and phones (rotate gate, safe-area handling, touch input) with 83 Vitest test files in the public repo.

Portfolio Studio — media-résumé site — Sep 2026 – present

Independent · React, TypeScript, Vite, Supabase · xylardark.github.io/Portfolio-Studio

- Every change goes through a pull request I review, with headless-Chrome checks at desktop and phone sizes run by the AI agents I direct; GitHub Actions deploys each merge.

ADDITIONAL EXPERIENCE

Delivery Driver (Uber, retail delivery) · Hamilton, ON — 2022 – 2026

EDUCATION

Diploma, Computer Systems Technology — Software Development · Mohawk College · Hamilton, ON · 2019

Fully remote · Eastern Time · Available immediately
