LUKE THOMPSON

HTML5 / PHASER GAME DEVELOPER

Hamilton, ON · 905-806-9257 · stevenlukethompson@gmail.com
Portfolio: xylardark.github.io/Portfolio-Studio/u/admin · GitHub: github.com/XylarDark

PROFESSIONAL SUMMARY

HTML5 game developer who shipped Shift, a playable Phaser 3 / TypeScript shop-and-delivery game for desktop and mobile browsers (including a PWA). Comfortable working independently to a deadline on 2D web games, and earlier contract work includes C# game and UI development at OutFusion. Based in Hamilton, Ontario (Eastern Time); available for remote contract work.

CORE SKILLS

Languages	TypeScript/JavaScript, HTML/CSS, C#, C++, Python
Game	Phaser 3, HTML5 (2D), Vite, Unreal Engine 5.8, Unity
Web & data	React, Supabase, REST APIs, ASP.NET, SQL
Workflow	Git/GitHub, playtesting, cross-browser and mobile QA, Visual Studio

SELECTED PROJECTS

Shift — playable shop & delivery game Aug – Sep 2026

Independent · Phaser 3, TypeScript, Vite · Live: xylardark.github.io/ShiftGame · Repo: github.com/XylarDark/ShiftGame

- Shipped a landscape-first browser and PWA game with a full shift loop: counter sales, pickups, and ID-checked deliveries on a handmade city map, plus a results card at close of day.
- Built a multi-scene Phaser 3.90 architecture (Boot, Title, Shop, Drive, Door, HUD) with deferred loading of world scenes, runtime texture atlases (people, city tiles, HUD type), and a custom sim on a fixed 60 Hz timestep with render interpolation — including cached A* routes and auto-drive, plus WASD/arrow nudge and multi-pointer tap input.
- Fitted a 16:9 mobile shell (portrait rotate-gate, landscape lock where the browser allows it, visualViewport and safe-area handling) and a render-budget (high/mid/low tiers, 30 fps cap on coarse pointers, scaled WebGL backbuffer, optional day/night PostFX). Service worker updates wait until the player is idle so a mid-shift reload cannot interrupt play. Also packaged a one-click portfolio embed.

Portfolio Studio / For People, By People Sep 2026 – present

Independent · React, TypeScript, Vite, Supabase · xylardark.github.io/Portfolio-Studio

- Shipped a public media-resume site with Studio editing, embeddable work cards, and a filtered swipe-jobs wedge (finite deck, cooldown, daily budget), using Supabase on the backend.

HomeWorld — Unreal Engine 5.8 / C++ game Feb 2026 – present

Independent (solo) · Unreal Engine 5.8, C++, Python tools · private repository, available on request

- Built C++ gameplay and data-driven world systems for an ARPG survival and family-sim (character and movement, Gameplay Ability System, inventory, time-of-day, homestead-to-planetoid loop), plus a versioned save system with migrations and tests.

RELEVANT EXPERIENCE

Video Game Developer · Contract · OutFusion · Hamilton, ON 2022

- Integrated and tested game UI art assets across mobile and desktop; validated UX through iterative playtesting.
- Built and tested C# REST API integrations for player data; partnered on bug verification and release quality.

Software Developer · 12-Month Contract · TruckSail · Ancaster, ON 2020

- Implemented STM32/CAN firmware with defect finding for reliability; built JS/Bootstrap UIs and optimized SQL.
- Maintained GitHub workflows; cross-browser QA and password-management security support.

ADDITIONAL EXPERIENCE

Delivery Driver (Uber, retail delivery) · Hamilton, ON 2022 – 2026

- Independent schedule while building a game-development portfolio in 2026 (HomeWorld, Shift, and Portfolio Studio). Reliable, accurate delivery in fast-paced and regulated retail settings; strong customer communication.

EDUCATION

Diploma, Computer Systems Technology — Software Development · Mohawk College · Hamilton, ON · 2019

Available for remote contract work · Eastern Time (UTC−5 / UTC−4)
