LUKE THOMPSON

GAME DEVELOPER

Hamilton, ON · 905-806-9257 · stevenlukethompson@gmail.com
Portfolio: xylardark.github.io/Portfolio-Studio/u/admin/portfolio · GitHub: github.com/XylarDark

PROFESSIONAL SUMMARY

Game developer focused on gameplay and systems work. Since February 2026 I have been developing HomeWorld solo, a private Unreal Engine 5.8 / C++ project, and I shipped Shift, a playable Phaser 3 shop-and-delivery game. Earlier contract work includes C# game and UI development at OutFusion. Open to hybrid or on-site roles in the GTA–Hamilton area.

CORE SKILLS

Languages	C++, C#, TypeScript/JavaScript, Python, HTML/CSS
Game	Unreal Engine 5.8, Gameplay Ability System, PCG, Phaser 3, Unity
Web & data	React, Vite, ASP.NET, SQL, REST APIs
Workflow	Git/GitHub, Visual Studio, playtesting, cross-browser QA

SELECTED PROJECTS

HomeWorld — Unreal Engine 5.8 / C++ game — Feb 2026 – present

Independent (solo) · Unreal Engine 5.8, C++, Python tools · private repository, available on request

- Built the C++ gameplay for an ARPG survival and family-sim aimed at PC: character and movement, Gameplay Ability System, inventory, time-of-day, and a homestead-to-planetoid loop (glider descent, shrine portal, gather, nurture, and interact).
- Built planetoid world systems, including a closed-mesh planet shell, PCG scatter, and data-driven zone placement and recipes rather than one-off baked maps.
- Implemented a versioned save system with per-system slices and migrations that refuse unknown newer saves; added C++ and Python tests around saves, a 7-axis sin/virtue system, and playtest beats.

Shift — playable shop & delivery game — Aug – Sep 2026

Independent · Phaser 3, TypeScript, Vite · Live: xylardark.github.io/ShiftGame

- Shipped a landscape-first browser/PWA game with a full shift loop: counter sales, pickups, and ID-checked deliveries on a handmade city map, plus a results card at close of day.
- Packaged a one-click portfolio embed and iterated pixel UI and player-facing copy for recruiter-ready play without an install.

Portfolio Studio / For People, By People — Sep 2026 – present

Independent · React, TypeScript, Vite, Supabase · xylardark.github.io/Portfolio-Studio

- Shipped a public media-resume site with Studio editing, embeddable work cards, and a filtered swipe-jobs wedge (finite deck, cooldown, daily budget).

RELEVANT EXPERIENCE

Video Game Developer · Contract · OutFusion · Hamilton, ON — 2022

- Integrated and tested game UI art assets across mobile and desktop; validated UX through iterative playtesting.
- Built and tested C# REST API integrations for player data; partnered on bug verification and release quality.

Software Developer · 12-Month Contract · TruckSail · Ancaster, ON — 2020

- Implemented STM32/CAN firmware with defect finding for reliability; built JS/Bootstrap UIs and optimized SQL.
- Maintained GitHub workflows; cross-browser QA and password-management security support.

ADDITIONAL EXPERIENCE

Delivery Driver (Uber; Kindling Cannabis) · Hamilton, ON — 2022 – 2026

- Independent schedule while building a game-development portfolio in 2026 (HomeWorld, Shift, and Portfolio Studio). Reliable, accurate delivery in fast-paced and regulated retail settings; strong customer communication.

EDUCATION

Diploma, Computer Systems Technology — Software Development · Mohawk College · Hamilton, ON · 2019

Valid Ontario Class G licence · Open to hybrid / on-site in the GTA–Hamilton area
