LUKE THOMPSON

GAME DEVELOPER

Hamilton, ON · 905-806-9257 · stevenlukethompson@gmail.com
Portfolio: xylardark.github.io/Portfolio-Studio/u/admin/portfolio · GitHub: github.com/XylarDark

PROFESSIONAL SUMMARY

Game developer focused on gameplay, systems, and developer tools. Since February 2026 I have been developing HomeWorld solo, a private Unreal Engine 5.8 / C++ game set on a 5 km-radius planetoid, along with DreamEngine (solo-dev automation harness) and Tether (phone app for reviewing computer work). I also shipped Shift, a playable Phaser 3 shop-and-delivery game. Earlier: game UI/UX in C# at OutFusion (2022), C++ ECU firmware at TruckSail (2020–21), and software development and QA at Evenica (2018–19). Open to remote roles, or hybrid / on-site in the GTA–Hamilton area.

CORE SKILLS

Languages	C++, C#, TypeScript/JavaScript, Python, HTML/CSS
Game	Unreal Engine 5.8, Gameplay Ability System, PCG, Phaser 3, Unity
Web & data	React, Vite, ASP.NET, SQL, REST APIs
Workflow	Git/GitHub, Visual Studio, editor tooling, playtesting, cross-browser QA

SELECTED PROJECTS

HomeWorld — Unreal Engine 5.8 / C++ game — Feb 2026 – present

Independent (solo) · Unreal Engine 5.8, C++, Python tools · private repository, walkthrough on request

- Built the C++ gameplay for an ARPG survival and family-sim aimed at PC: character and movement, Gameplay Ability System, inventory, time-of-day, and a homestead-to-planetoid loop.
- Chapter 1's feature walk (homestead, planting, backpack, gathering, rune unlock, camp, bed-to-spirit, nurture, and portal camp) is merged and covered by automated play-in-editor tests. Planetoid systems use a 5 km-radius closed-mesh shell, PCG scatter, and data-driven zone placement.

DreamEngine — solo-dev automation harness — Nov 2026 – present

Independent (solo) · agent orchestration, scheduled automation · private repository, walkthrough on request

- A solo-dev "company in a box": one person steers while parallel agent lanes (HEALTH, P6, DREAM, BOOKEND, TETHER) build in local coding-agent sessions, driven by a five-minute scheduled tick.
- Built a done-gate (rebase, test rerun, merge-ready check), merge train, auto-resume, status notifier, and tool index (123 merged pull requests as of 12 Nov 2026). Preference-engine Layer 1 auto-defaults only at a 95% take rate over at least 20 evidenced answers; safety-sensitive types never auto-default. Dream intake has one front door; a first end-to-end dream is in progress.

Tether — phone app for reviewing computer work — Nov 2026 – present

Independent (solo) · TypeScript, phone PWA · went live 11 Nov 2026 · private repository, walkthrough on request

- Phone PWA with push notifications and actionable decision cards that write answers back and can run phone actions. The phone is for reading, approving, and running declared actions — not for editing code or opening a public port.

Shift — playable shop & delivery game — Aug – Sep 2026

Independent · Phaser 3, TypeScript, Vite · Live: xylardark.github.io/ShiftGame

- Shipped a landscape-first browser/PWA game with a full shift loop: counter sales, pickups, and ID-checked deliveries on a handmade city map, plus a results card at close of day.

Portfolio Studio — Sep 2026 – present

Independent · React, TypeScript, Vite, Supabase · xylardark.github.io/Portfolio-Studio

- Shipped a public media-résumé site with Studio editing and embeddable work cards.

RELEVANT EXPERIENCE

Game Developer · OutFusion · Hamilton, ON — Feb 2022 – Dec 2022

- Implemented game UI/UX from the design docs; integrated and tested game UI art assets across mobile and desktop; validated UX through iterative playtesting.
- Built and tested C# REST API integrations for player data; partnered on bug verification and release quality.

Software Developer · TruckSail · Ancaster, ON — Feb 2020 – Jan 2021

- Wrote C++ firmware for truck ECU devices (STM32, CAN bus) with defect finding; built JS/Bootstrap UIs, optimized SQL and maintained GitHub workflows.

Software Developer & QA Tester · Evenica · Burlington, ON — May 2018 – Sep 2019

- Built and tested client software (Andrew Peller, Young's Market Company, MM Realty International): T-SQL, C#, Linux, and Laravel (MySQL, PHP, JavaScript/jQuery, Vue.js).

Delivery Driver (Uber, retail delivery) · Hamilton, ON — Jun 2022 – present

EDUCATION

Diploma, Computer Systems Technology — Software Development · Mohawk College · Hamilton, ON · 2019

Valid Ontario Class G licence · Open to remote, or hybrid / on-site in the GTA–Hamilton area
